EXERCISE SUBMIT COMMAND GUIDELINES

The submit command will be used for all exercise submissions.

From the directory containing your exercise files, issue the `submit` command. The `submit` command bundles the current directory into a tar archive, and sends it to a location for grading. It will have the following format:

```
$ submit ece330 ex <project>
```

The project name for exercises will use the following format:

```
ex01, ex02a, ...
```
